ELMIR ALIYEV

Ankara, Turkey elmir.aliyev@ug.bilkent.edu.tr +905451029380 in/elmiraliyev1 github.com/elmiraliyev123

SUMMARY

3rd-year Information Systems student and backend-focused software engineer seeking a mandatory summer internship (June–September 2026) at European startups as part of curriculum requirements. Experienced in building and deploying production-ready Laravel and Kotlin applications using Docker, REST APIs, and database optimization. Erasmus+ Traineeship funding secured (no cost to employer).

PROJECT

AutoLens – Event Management Platform

github.com/elmiraliyev123/256project

- Designed and implemented backend services using PHP and MySQL, ensuring data integrity for event listings.
- Built RESTful APIs with dynamic filtering, reducing search query time by 40%.
- Managed production deployment and domain configuration, maintaining 99.5% uptime.

BilMatch – Campus Social Platform

github.com/elmiraliyev123/BilMatch2

- Developed a Dockerized Laravel-based web platform for university students.
- Implemented secure JWT authentication and optimized database queries, reducing page load time to under 0.8s.
- Deployed to production in Dec 2025; currently offline for scheduled V2 architecture refactoring.

PharmacyOn – Inventory Management App

github.com/elmiraliyev123/PharmacyOn-

- Developing a native Android application using Kotlin and Android SDK.
- Implementing Room Database for offline-first storage and REST API integration for synchronization.
- Designed conflict resolution systems to handle network transitions automatically.

Car Rental System

github.com/elmiraliyev123/CarRentalSystem-Java

- Built a desktop management application using Java and Swing (JFrame).
- Refactored codebase using OOP principles (Polymorphism), reducing code duplication by 45% across rental workflows.

EDUCATION

B.Sc. in Information Systems and Technologies (CTIS)

Bilkent University · Ankara, Turkey · 2023 – Present (Expected 2027)

- Relevant Coursework: Algorithms, Database Management Systems, Web Technologies, Object-Oriented Programming, Computer Networks.
- Completing mandatory summer internship (CTIS 290) requirement.

Summer School – Applied Cybersecurity

Metropolia University of Applied Sciences · Helsinki, Finland · Summer 2025

- Covered OWASP Top 10 vulnerabilities, network security fundamentals, and secure coding practices.

B.Sc. in Software Engineering (Transferred)

Azerbaijan State Oil and Industry University · Baku, Azerbaijan · 2022 – 2023

- Focused on C and C++ programming fundamentals before transferring to Bilkent University.

CERTIFICATIONS

Cisco CCNA – Fundamentals of Computer Networks (Participation)

INVOLVEMENT

Technical Translator

Khan Academy (Azerbaijani) · February 2023 - May 2023

- Localized complex IT and Mathematics educational content into Azerbaijani.
- Translated technical terminology across programming and algorithms modules, ensuring accuracy for native learners.
- Collaborated with international translation team to maintain consistency in educational materials.

Organizing Team Member

TEDx Bilkent University · January 2024 - April 2024

- Managed event logistics and facilitated communication between technical teams.

SKILLS

Programming Languages: PHP, Kotlin, Java, Python, SQL, C, C++

Backend: Laravel, Spring Boot, REST APIs, JWT Authentication

Concepts: OOP, MVC, Clean Architecture, Database Design, Network Security

Languages: English (Professional), Russian (Professional), German (Basic), Turkish (Professional), Azerbaijani (Native)

Databases: MySQL

Mobile: Android SDK, Room Database

Concepts: OOP, MVC Architecture, Clean Architecture, Database Design, Network Security
